(INDEX DEPARTMENT)

Times Square, New York

From New Republic, August 4, 1920.

The New York Times was selected as the medium through which to study the news; first, because The Times, as great as any newspaper in America, and greater than the majority, has the means for securing news; second, because the method of the news in The Times is technically admirable; third, because The Times Index is an anonymous convenience to any student of contemporary history; fourth, because the bound volumes are easily accessible; and fifth, because The Times is one of the really great newspapers of the world.

Libraries and Institutions in the several States and in foreign countries listed above have files of THE NEW YORK TIMES, which are kept by them and are accessible. Librarians who wish the names of their libraries added to this list as keeping files of THE TIMES should notify THE NEW YORK TIMES INDEX before the first day of the next quarter.

NOTICE TO SUBSCRIBERS OF THE NEW YORK TIMES INDEX

In order to locate exactly all matter referred to in The New York Times Index, recourse should be had to the last edition of The Times, from which the Index is compiled. This edition is indicated by three or more stars (***) on the line between the number of the issue and the date on the first page.

In cases where the first edition is the one received by subscribers, efforts will be made to substitute the last edition on notification being made that the latter is desired. This will involve a slight delay in receipt of the paper, due to the difference of time in going to press.

If you keep a file of The New York Times, we will by request add your name to the list in the front of the Index.

Issued Quarterly

Vol. VIII. No. 4

October—November—December

THE NEW YORK TIMES

Times Square, N. Y.

Copyright, 1920, by The New York Times Co.

How to Use the Index

The Index is compiled from the Last Edition of The Times.

In each entry the date is given, then the number of the page, followed by a colon and the number of the column. The columns are understood to be numbered 1-8, from left to right. Sat., D 25, 1-8, refers to the eighth column of the first page of the issue of THE TIMES of DEC. 25. Sections of the Sunday edition other than the first, or news section, are indicated by Roman numerals.

Notices of individuals and corporations, if not found under their names, are tabulated as statistics under general headings, such as ACCIDENTS, BUSINESS Troubles, SUICIDES, Etc.

ART COMPETITIONS, EXHIBITS, SALES, Etc.—Entered under ART, with cross-references from Associations and, in cases of large personal collections, cross-references from the names of the owners.

BOOK REVIEWS—Entered under the general heading BOOKS—Reviews, except where several books on the same subject are given extensive reviews, in which case an entry is made also under the subject itself. Entries are made under the author's name when the book is the subject of a special article in the Sunday Magazine.

BIBLIOGRAPHIES—Entered under the subject, as EUROPEAN War—Bibliography.

DEATHS—Entered under personal names.

A tabulated list of subheads is given under subjects occupying considerable space, immediately preceding the actual indexing of the topic. This will aid in determining more quickly under which subhead the desired material may be found.

Date following a cross-reference indicates date under main heading on which the entry appears.

The New York Times Index

The New York Times

America's Representative Newspaper

THE NEW YORK TIMES is the best known American newspaper. It is a newspaper for intelligent, thoughtful people, and, as such, far exceeds in circulation any newspaper of its class in the world.

Surpassing News Service

In the quantity and quality of foreign news received by cable, news of the United States and other countries of America, and the metropolitan district of New York, *The New York Times* surpasses every other newspaper.

Incomparable Sunday Edition

Its *Sunday edition,* in news and supplemental sections, and in the *Book Review and Magazine Section,* printed and illustrated by the rotogravure process, possesses unusual qualities of excellence. It contains not only all the news of the book world, but many attractive magazine features.

World Activities Pictured

The *Rotogravure-Picture Sections* of the Sunday edition, consisting entirely of pictures, illustrate the most striking activities of the world.

A Habit in Many Homes

In thousands of homes in 5,000 cities and towns in the United States, the reading of *The New York Times* has become a daily habit.

In the fabric of language, the word STEINWAY has come to mean the utmost in perfection.

So masterfully have four generations of the virile Steinway family striven for the ideals that the word STEINWAY has come to mean supreme achievement.

The virility of STEINWAY genius is such that laurels won are but an inspiration to still greater effort.

Is it any wonder then that the word STEINWAY so breathes quality and supremacy as to be universally so unconsciously chosen as the symbol of perfection?
